

## ISO 9001:

One of the priorities for XTI FOOTWEAR is to provide the maximum quality of the finished product, integrating the improvement during the whole manufacturing chain of our products, from the initial design creation to the packing of the finished product.

All the production chain has been studied and defined through processes, that allow a monitoring and control of each stage.

Hence in 2018 we decided to take a step forward and certificate our management system according to ISO 9001:15 (CERTIFICATE ES18/85222) norm.

## Our imperative goals are:

- To integrate quality at all productive process stages and at all levels of the organization, from direction to warehouse staff.
- To maintain a system of continuous improvement, open and developed, integrating to all participants in the processes.
- To develop quality products, innovative and creative, making them competitive within the actual market.
- To use the best manufacturing materials and techniques, to achieve advances in design, durability and comfort.
- To train and aware all the organization staff of:
  - Identifying system deviations.
  - Controlling the processes.
  - The continuous improvement.
